About El Chino:

"Marcelo Gutierrez has been one of our most influential teachers over the years.

The brilliance of his method resides in his intimate knowledge of the musculature involved in dancing tango, and of how best to train these specific muscles and muscle groups to work most effectively. He has developed various exercises for this purpose-- ones that aid the body in discovering sensations, and others that strengthen the

muscles involved-- as well as exercises for maintaining posture, and those aimed at increasing sharpness and power of movement. Moreover, he relates pure movement of the body to the floor on which one dances, to the space through which one moves, and to one's partner." -Adam & Ciko
